To Whom it May Concern:

This reference letter is provided at the request of Rishabh Jain. Rishabh participated in our GajShield internship program under my supervision. He worked along with our development team from 1st June to 5th July. He worked on an analytics system using web2py, Python development platform and also on user analytics using machine learning in Python. During that time I developed a very high regard for Rishabh based on the outstanding contributions that he made to the development of our product.

Rishabh was quick to adapt to our development environment and was the most productive intern in our office. He exhibited a rare combination of speed, agility, logic and accuracy. I was particularly impressed by his programming skills and his eagerness to learn.

Rishabh was thorough in his approach and followed instructions in a detailed manner. He worked independently and rarely did we have to explain a process more than once.

Rishabh's strong human relations skills enabled him to interface very effectively with other programmers. He was able to win their confidence and relay his thoughts in a clear and coherent manner. I am quite impressed with this outstanding young man and give him my strongest recommendation for roles which require technology development.

Please feel free to contact me if you need additional information or perspective.

Sincerely,

Sonit Jain.
