--	---

The institute has Lecture Capture System which records and shares lectures. It enables teachers to record voice, video, and other content. The recorded material is made accessible to students for on-demand viewing, either in the present or as a resource that has been archived. Every branch at the institute has lecture capture setup for every subject of all year.

### **How does Lecture Capturing System Work**

STEP1: Automatic Trigger for Recording of Lectures

STEP2: Recording of Complete Classroom Experience

STEP3: Recorded Content Processed and Stored on Campus/Cloud.

STEP4: Content Management System to Catalog and distribute content.

STEP5: Content Accessible on Multiple Devices.

# Set up Architecture

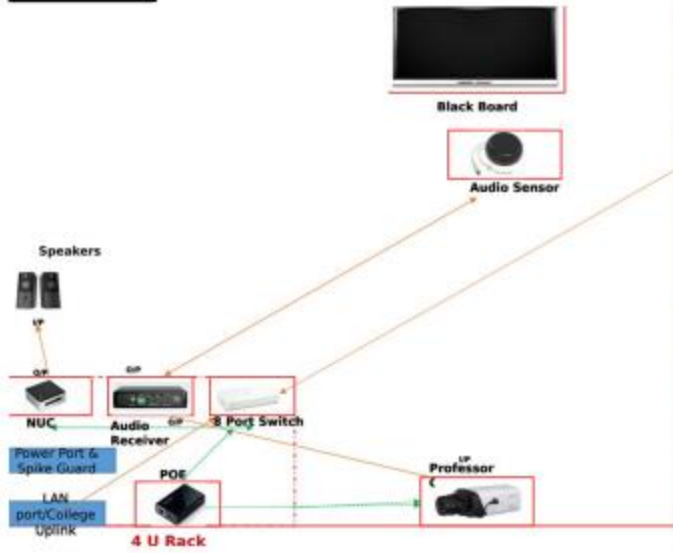

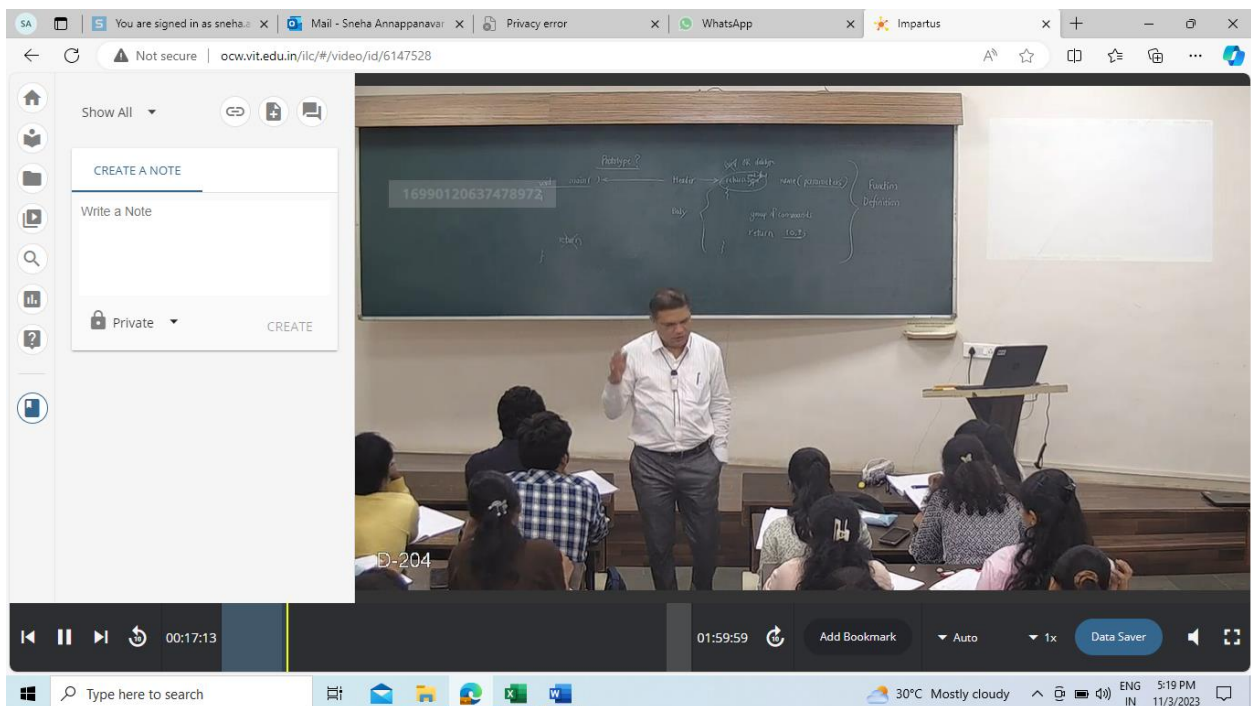

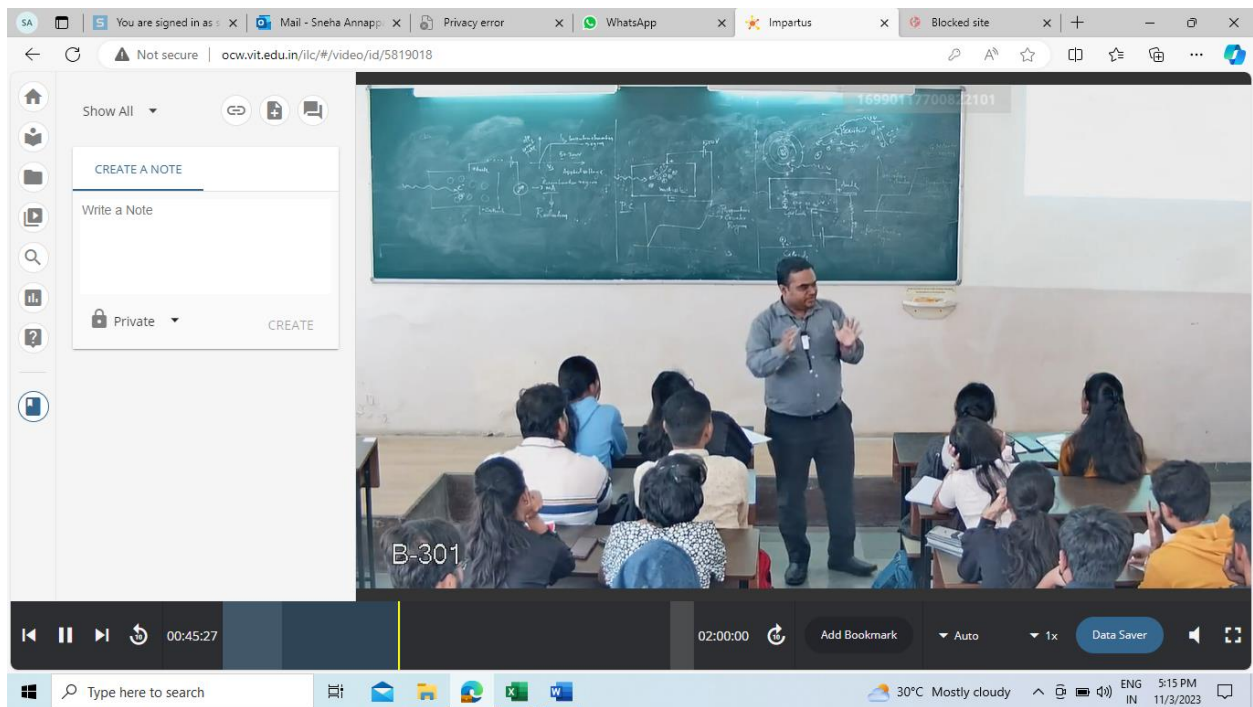

Fig: LCS setup in classroom at institute

**Fig: Lecture capture recorded.**

With the LCS system at the institute the benefits for the students are as follows

**Enhanced Learning Experience:** Lecture captures give students access to extra resources to support their in-class learning, enhancing the learning experience. For easier comprehension and note-taking, they can go over challenging subjects again, go over key ideas, or pause and rewind sections.

**Exam preparation and revision:** By reviewing lectures, reiterating their understanding, and getting answers to any questions they might have, students can use lecture captures to review for tests.
