

Information Technology has taken the world by storm. E-learning is the use of electronic educational technology in teaching and learning. Computers have become increasingly common in the classroom and the increasing access to computers is also changing the way classes are taught. Not only is the popularity of technology increasing because of its increasing availability, but also because of the capabilities of technologies that traditional classroom materials such as chalk and blackboard alone do not provide. Vidyalankar has always been a step ahead when it comes to using technology for benefit of students. The institute has a digitally enabled learning environment. Academic administration plans, assignments, solutions after examinations, quizzes, lecture presentations, syllabus, study material etc. are all made available to students.

The following are some more e-learning methods which reinforce this view for the benefit of the student community.

Name of the e-content development facilities
Digital Repository using vRefer on LAN.
Lecture Capture system
Digital content (E-Books) developed by faculty for their respective courses
VLive
VRefer

As per institutes policy, the above repositories are accessible to authorised users through valid login credentials only. This document includes screenshot/samples of the E-content repositories. Any official body such as NAAC/NBA/NIRF/AICTE etc. that require access to the complete repository are requested to write to <u>principal@vit.edu.in</u> for login credentials of the same.
