has successfully completed the online nano-degree Specialization

### Internet of Things

This Specialization covers the development of Internet of Things (IoT) products and services—including devices for sensing, communication, processing, and computation. It helps you develop skills and experiences you can employ in designing IoT systems. Knowledge of this theory and practice helps in the IoT solutions for wide range of domains or IoT connected devices security, embedded systems, communication. In the final capstone project, development in cooperation with customers, you'll apply the skills you learned in this specialization to design IoT products for a platform.
