HOD MMS

From the HOD's Desk

"The price of greatness is responsibility"
- Winston Churchill

Hello and welcome to all with warm greetings to this academic year's last newsletter. I have been with this batch of MMS students for a year now and it gives me immense pleasure to see them progress into their second year.

When I look back on the year that has passed I can only recall the prosperous moments that had been spent on the premises of this institution. The events that were earnestly executed by the students, the guidance provided by the ever-so-helpful faculty, the participation of the students, everything has been adorned on the walls. The students excelled in their studies and now they are in their internships gaining experiences that will be helpful to them in their future. The faculty members are striving in their own terms as they are serving as a consistent guide for the students of their specialization.

The Department guides its students by conducting informative seminars and exciting guest lectures as a value addition. Activities like organizing events, exploring the realities of managing them, getting exposure towards dealing with people has given the students a well-rounded experience.

I assure you that the accreditation of A+ status given to our college will definitely help our upcoming students in acquiring good job opportunities and an even better life experience.

The Department has been and always will work to provide excellent educational and placement opportunities. To step up and grasp such opportunities and use them is up to all the students. I hope the students are learning great skills at their internships and I wish them all the good fortune for their final year.

The true measure of any leader is performance.

MMS. i

NOTES:

I joined this committee with the hopes that I will be able to express my thoughts into words to a major readership and that's exactly what it has delivered. I enjoyed being a part of this committee and I will always cherish the writings I have produced and the experience that I have gained will forever reside in me.

- Rohit Mane
(Editor)

When I was chosen to be a part of this committee a year ago, I was both excited and nervous for my first experience being part of a student committee. I've always had a desire to test my skills as a creative or editorial writer but never pushed myself to do anything about it since I felt it would interfere with my academics. But my experience was contrary to this belief as being a part of this committee made my first year at VIT MMS much more enjoyable, getting to relive some of the years momentous occasions while writing about them.

INTERNSHIP EXPERIENCES

I was very happy when I came to know that I have got an opportunity to work with MMRC (Mumbai Metro Rail Corporation) as a summer intern for 2 months.

I started with my new journey of 2 months towards developing new skills, identifying my strengths and learning various new approaches to make a better life. I was introduced with my specialized department and the superiors who would guide me in the learning process of two months.

In their guidance, I was given different tasks of Auditing and looking after finance activities. This gave me exposure in vendors audits, leasing of premises, as well as scrutiny related to contracts submitted by the vendors which were the major activities looked in by the department I was associated with at MMRC.

As I incorporate the whole of my learnings during this course of action, I am grateful towards VIT for enlightening all the students with fruitful opportunities.

- Tabish Shaikh
(Placement Committee)

I was placed in IIFL (India Infoline Finance Limited) in the IT department since my specialization was in Systems.

My internship was for a period of 2 months with the opportunity to work as a Business Analyst. I was expected to work with the Business Strategist team, Software Developers and the Testing team in order to understand the application workflow mostly other than databases, Codes, APIs, project trackers and report servers of the project that I was tagged to. It was really a great experience to work with IIFL with a mixture of knowledge and deadlines.

- Sreelata Nair
(Cultural Head)

Persevere like a seed; when people try to bury you, flourish!

NOTE:

I have always marveled at how sheer words and raw human genius assembled can be a reflection of what goes around in an institution.

I feel so personally rewarded to have led this committee. All it took to make it a success were keen proofreading, sober second thoughts, and utter willingness to go the extra mile.

In the numerous decisions that we took to shape this newsletter, we worked hard to get better - whether it was to move an inch of the margin or to get the picture just right, we wanted the best - every issue, every quarter.

I am so thankful to all who contributed, supported, and read these newsletters as we tried to be inclusive of every event and everyone.

I feel at once delighted and bewildered for the incoming team. I hope and encourage them to continue to make this newsletter something that everyone looks forward to.

(Editor-In-Chief)

INTERNSHIP EXPERIENCES

I undertook a two months internship at one of India's largest multinational company - TCS (Tata Consultancy Services).

The main objective was to create a central repository to maintain all the data and reports related to their partner's information which would, in turn, help them to carry out their business activities. It was divided into three stages to understand the current scenario, meet the developers and find the scope by discussing with them and finally create a structure for storing Partners Information.

The overall experience of working as an intern at TCS was fascinating & the experience I got was enough to mold me as I advance into my career.

I would really like to thank the Training and Placement team of Vidyalankar for giving me this wonderful opportunity to work with TCS.

- Runal Patil

During my short duration at HDFC, I observed that trust plays a major factor in how well people perform. Trust of the customer on the bank to provide them with wealth security as well as the trust of the customer on the employees of the bank to provide them with information on the product options best suited for their needs.

This goes a long way to ensure the progress of the bank's business and the completion of the monthly targets of the employees.

I was lucky enough to accompany the Relationship Managers on sales calls with their customers and learn some of their pitching techniques. My Industry mentor also encouraged me to go out in the market so as to better understand the customer base of the bank.

- Surya Menon
(Alumni Committee)

UPCOMING EVENTS:

1. RESULTS
2. INDUCTION

DID YOU KNOW?

Breaking the glass ceiling, Mrs. Anshula Kant became the first woman Chief Financial Officer (CFO) and Managing Director (MD) of the World Bank. She has had 35 years experience in the field of Banking, Finance, and Innovative Technology.

INTERNSHIP EXPERIENCES

I completed my Summer Internship working at Research to Invest, where I was tasked to research the manufacturing, check the feasibility and other relevant factors about a product that the company wanted to manufacture. I plan to work in the manufacturing sector in the future and hence, was very interested in the product development aspect of it. This was a very valuable learning proposition for me, to find out if I had what the field needed and if the field was even the right choice for me. I thank the VIT MMS Placement Team for bringing me this opportunity.

(Newsletter Committee)

I started my summer internship at Amul on 3rd May 2019. Each intern was given a task of opening new Amul ice cream outlets in their respective distributors' area. I was reporting to Mr. Nikhil Kudmethe, an alumnus of VIT and I was coordinating with Aaradhya Sales Distributor from Lalbaug.

As per the company's instructions, we had to work alongside a salesman from the distributor's warehouse and monitor the salesman's work and try and open new Amul outlets at the same time. However, due to a conflict in our schedules and his sheer belief in my abilities, I was assigned to go solo from day 3 of my internship.

I took it upon as a challenge to try and open new Amul outlets on my own. Successfully, I opened close to 40 new Amul Ice Cream outlets and re-opened 17 outlets, which had stopped taking ice cream orders from the distributor.

By the end of the two months, I was the intern who had opened the most number of new Amul ice cream outlets.

- Vitul Mukadam
(Placement Com)

Whatever your ashes are, emerge from them a better version.
